

I am against the use of BPL. While not an expert on the topic of Radio Frequency Interference (RFI), I have read many of the documents available on the ARRL web site (www.arrl.org). This information has convinced me that BPL in its current state of development would be a potent producer of RFI. Please add weight to the comments made by the experts in the field such as Ed Hare, of ARRL, in your consideration of this proposal.

Thank You.

Michael Bowman
